INDIANS IN OKLAHOMA, SOCIAL AND ECONOMIC STATISTICAL DATA.

BY- HUNTER, BILL TUCKER, TOM

OKLAHOMA STATE EMPLOYMENT SECURITY COMMISSION

PUB DATE SEP 66

EDRS FRICE MF-\$0.25 HC-\$1.72 41P.

DESCRIPTORS- *AMERICAN INDIANS, ECONOMIC FACTORS, *ECONOMIC STATUS, EDUCATIONAL DISADVANTAGEMENT, HISTORY, INCOME, *POPULATION DISTRIBUTION, POPULATION TRENDS, RURAL POPULATION, STATISTICAL DATA, *STATISTICAL SURVEYS, SOCIAL FACTORS, *SOCIAL STATUS, UNEMPLOYMENT, FIVE CIVILIZED TRIBES,

STATISTICAL DATA ARE PRESENTED ON THE INDIAN POPULATION OF OKLAHOMA, ALONG WITH A BRIEF HISTORY OF SOME OF THE 67 INDIAN TRIBES FOUND IN THE STATE AND NARRATIVE SUMMARIES OF THE STATISTICAL DATA. MAPS OF CURRENT AND PAST INDIAN LANDS ARE SHOWN IN RELATION TO CURRENT COUNTY LINES. GRAPHS PORTRAY POPULATION COMPOSITION, RURAL AND URBAN POPULATION DISTRIBUTION, EDUCATIONAL ATTAINMENT, MEDIAN INCOME, RATE OF UNEMPLOYMENT, AND 1959 MALE INCOME DATA. THIS MATERIAL IS PRESENTED IN PERCENTAGE FORM, COMPARING OKLAHOMA WHITE FIGURES, NATIONAL INDIAN FIGURES, AND NATIONAL POPULATION FIGURES. A LIST OF DEFINITIONS EXPLAINS, SOME OF THE CONCEPTS AND METHODS USED BY THE CENSUS BUREAU IN COMPILING DATA ON THE INDIANS. APPENDICES GIVE STATISTICAL DATA IN TABLE FORM FOR POPULATION DISTRIBUTION, EMPLOYMENT, AGE AND SEX, AND INCOME DISTRIBUTION. INFORMATION FOR THIS REPORT WAS OBTAINED OR ADAPTED FROM THE 1960 CENSUS. PREFACE

Oklahoma's early history primarily involves the saga of the American Indian. However, today, the Indian comprises only a small, though significant, portion of the State's population. Statistical information regarding this race of people is relatively scarce. Nevertheless, inquiries for information on Indians are frequently received by this Agency from government officials, civic organizations and individuals. Therefore, this report was designed to meet a portion of such requests by providing statistical data in a concise and readily available form.

Bill Hunter, Labor Market Analyst, Labor Market Information Section, was responsible for the over-all report while Tom Tucker, Research Assistant, prepared the historical background on Indians in Oklahoma and tabulations used in statistical tables. This publication was prepared as a part of the activities of the Oklahoma Employment Security Commission under the Oklahoma Employment Security Act, which includes the responsibility for developing and publishing information and studies relating to the labor market.

HISTORICAL BACKGROUND

The purchase of the Louisiana Territory in 1803, including present-day Oklahoma, furnished the government of the United States a huge area for expansion. Subsequently, the new territory provided an apparent solution to the Nation's problem, the disposition of Indians whose presence was no longer desired in the Southeast, then the Southern, United States. To be specific, the Creek, Choctaw, Chickasaw, Seminole, and Cherokee Indians held, by virtue of treaties with the United States, tremendous land areas coveted by White settlers. What eventually happened to these tribes forms the background of Oklahoma's unique history.

These Indian tribes are known collectively as the five civilized tribes. Over the years, they had developed sophisticated and stable governments. For example, the Choctaws had adopted written laws prior to 1820. Subsequently, in 1826, a new Choctaw constitution provided for election of three district chiefs, an elective council, a judiciary, and included a bill of rights. Furthermore, the first Indian alphabet was devised by Sequoyah, a Cherokee, and was used to print a Cherokee language newspaper in 1828. Soon, more papers and many books, including the Bible, were translated and published. In fact, the Cherokees were better read in the early days than most of the White settlers around them.

The Choctaw tribe in 1820 became the first to accept a treaty which called for trading their homeland for land in what was to become Oklahoma. In the case of the Cherokees, Choctaws and Creeks, only a portion of the Indians voluntarily moved to the new country; the others, many having fine homes and some, great plantations, chose to remain in the East. The eventual forced removal of most of the members in the five civilized tribes, especially the Seminoles and Chickasaws, was accompanied by violence and great personal hardships. The difficulties and deprivation of the march West took a heavy toll in Indian life. For example, 15,000 Creeks reached the new land after a journey that claimed about 3,500 lives, including virtually all infants, small children and old people. The route of the Indians' wretched trek became known as the "Trail of Tears".

Not all came quietly. To remove 3,000 Seminoles it was necessary that the United States keep an Army in the field from 1835 to 1842 at a cost of \$20 million or \$6,500 per man, woman, and child actually rounded up and relocated. Fifteen-hundred soldiers died in the fighting, one to every two Seminoles moved. $\frac{1}{}$ So great was the effort and expense required that the United States finally forsook the struggle. Descendants of the unvanquished Seminoles live in Florida today, more than 100 years later.

For those who moved, the years from 1830 to the Civil War were truly outstanding. The five Indian tribes, Cherokee, Creek, Choctaw, Chickasaw, and Seminole, flourished. Each of the tribes established a republican form of government, with an executive, legislative, and a judicial branch. For those who lived within the new Indian nations there was peace with dignity. More specifically, the citizenry prospered; education thrived and the White settler was still far away. Robert M. Jones, a Choctaw planter, developed five plantations in the Red River valley, owned 500 slaves and a fleet of river steamers. During this early span, the Choctaw nation could number among its citizens graduates from Union, Dartmouth, and Yale.

1/ Gibson, Arrell M., Oklahoma, A History of Five Centuries, Norman, Oklahoma Harlow Publishing Company, 1965.

Most of the treaties giving the Indians land in Oklahoma provided that the area granted would never be included within the borders of any state or territory of the United States and that the Indians could make their own laws and govern themselves. Whether this provision might have saved the Indians from eventually being over-run by White men is a question made moot by the Civil War. In that great conflict, the Indian governments allied themselves with the Confederacy and therefore shared with the South the postwar status of a vanquished state. As a result of this alliance, the old treaties were suspended and all rights thereunder forfeited.

After the war new treaties were negotiated which subscribed in principle to the development of a unified government for the Territory. Each nation 'greed to grant railroad rights-of-way and provision was made for the establishment of federal courts ir lahoma.

The war-pillaged land and decimated population were never the same. Efforts of the civilized tribes to rebaild their shattered societies were almost futile. The Territory became a federal dumping grounds for Indians regardless of their origin or mores. About this time, cowboys from Texas began driving great herds of cattle through Oklahoma to railheads in Kansas. In the 1870's railroads were constructed in the territory and with them came wild, roaring towns. Oklahoma then became what the classic image of the West portrays, a land of cowboys, Indians, Cavalry, outlaws, marshals, and homesteaders. Plenty was replaced by want and education was often neglected.

Throughout the late 1800's a second period of migration comparable to the Trail of Tears transpired. Indians from the North and West were moved into Oklahoma, mostly into the western half of the State. Among them were the Osage who had previously resided in Northeast Oklahoma. They were given a large, but near worthless, tract in the North-Central portion where oil was later discovered making them an extremely wealthy people. The Kaws came, the Sac and the Fox, and the Kickapoos. However, a large part of the Kickapoos settled in northern Mexico at the request of that County. In return for defending the Mexican frontier from attacks by Kiowas and Comanches, they were given a reservation. Even today, Kickapoos move freely between their lands in Oklahoma and their reservation in Mexico. Ottoes, Missouris, Pawnees, Shawnees, Iowas, Nez Perces, Tonkawas, Delawares, Quapaws, Senecas, Miamis, Apaches, Kiowas, Cheyenne and Arapahoes, and a host of other Indians either migrated or were moved to join those already in Oklahoma. Today, there are 67 tribes in Oklahoma. Of these, only six are native to the State, the Caddos, Wichitas, Pawnees, Quapaws, Osages and Apaches.

Following the Civil War, the nomadic Plains Indians were infuriated by the White man's wanton destruction of the buffalo herds, their principal source of food and clothing. War parties began raiding cattle herds in Texas, attacking hunters, wagon trains and even settlements. Military retribution followed until by the end of the 1880's the western Indians were disarmed, dismounted and demoralized.

Meanwhile, coal was discovered in the eastern part of the Territory and lead and zinc mines were opened in the northeast. Thereafter, the White man came to operate the mines and oftentimes brought his family to settle permanently in the new land. As time passed, Whites married Indian women, secured tribal rights and occupied large pieces of reservation land. Eventually, Whites began to gather in southern Kansas and agitate for opening of the unassigned territory located near the center of Oklahoma. The railroad companies, bankers, and politicians favored settlement of the area. The congregations of "Boomers" on the borders of the territory grew larger and more unruly, sometimes spawning raids into the region. Finally, the

government relented so that on April 22, 1889, an estimated 50,000 Whites rushed over the border to seize 2,000,000 acres of unassigned lands in the Oklahoma Territory.

In 1890, Congress passed the Organic Act making Oklahoma a Territory of the United States. More runs followed. On April 19, 1892, some 3,500,000 acres of Cheyenne and Arapaho lands were opened; and on September 16, 1893, 6,000,000 acres of the former Cherokee Outlet were settled. Also in 1893, a commission was set up to supervise the dividing of the communal lands of the Indian Territory into individual allotments to make their system of land holding conform to that of the United States. The Indians resisted this action vehemently. In 1895, the first sentence of the final page was written when the small Kickapoo reservation was opened after each Indian was given an individual 80-acre allotment. The remaining land was released to settlers.

Next, in August 1901, a lottery was held at Fort Sill and Fort Reno for about 2,000,000 acres of Kiowa, Comanche, Wichita, Caddo and Apache lands. Thereafter, the State was divided between the Oklahoma Territory in the west and the Indian Territory of the east. These developments led to proposals for Statehood. The Whites were in favor and the Indians opposed the idea. The Indians' resistance to amalgamation with White Oklahoma as one state proved futile.

On June 16, 1906, the Oklahoma Enabling Act was passed. A little over a year later, on November 16, 1907, Oklahoma was admitted to the Union as the 46th State.

After Statehood, the Indians ceased to play a dominant role in the affairs of Oklahoma. Unused to private ownership of land, they often did not know how to manage it. In spite of some government efforts to protect them, many lost their land to the more experienced and sometimes unscrupulous Whites. Of the 30,000,000 acres originally allotted, it is estimated that today less than ten percent are in Indian hands. $\frac{1}{}$ As the State's population increased, rising from 70,000 in 1890 to 700,000 in 1906, the Indian became a small minority, seldom to be mentioned in post-Statehood history.

Today, the Oklahoma Indian is still primarily a rural dweller. However, they also live and labor in the cities. As the following figures indicate, they attend school for fewer years than their White brothers; earn less and have a higher incidence of unemployment. To this day, many live in small isolated rural communities in abject poverty. A few, like some of the Kickapoos who move between their Oklahoma and Mexican lands, do not speak English and seem almost hopelessly alien to our society.

POPULATION

Indians residing in Oklahoma numbered 64,689 and represented 12.4 percent of all Indians in the United States in April 1960. At that time, Arizona was the only state with a larger Indian population. Converse to Oklahoma's total resident count, where 62.9 percent resided in urban places, 63.0 percent of the State's Indians lived in rural areas. Also noteworthy, more than half of all Indians were classified as rural-nonfarm residents.

Wright, Muriel H., A Guide to the Indian Tribes of Oklahoma, Norman, Oklahoma: University of Oklahoma Press, 1951.

There has been little over-all change in the number of Indians residing in Oklahoma. According to the U.S. Census, there were 64,456 Indians living in what is now Oklahoma in 1890. This count fluctuated in following decennial censuses, however, the latest enumeration reveals an almost identical number as that recorded 70 years ago.

Approximately one-fourth of Oklahoma's Indians in 1960 resided in the State's three Standard Metropolitan Statistical Areas (SMSAs). Individual cities with the largest number of Indian residents were, Oklahoma City, Tulsa, Muskogee, Lawton and Shawnee. Cities with the largest proportion of Indians in their population were Okmulgee, Seminole, Miami, Shawnee, Sapulpa and Muskogee.

Oklahoma counties having the greatest count of Indians during 1960, in descending numerical order, were Oklahoma, Tulsa, Cherokee, Caddo and Adair. However, on a percentage basis, Adair County led with Indians representing 23.3 percent of its total population, followed by Cherokee, Delaware, Caddo, and McIntosh County. (See Figure II)

Indian Areas

Please refer to the section of "Definitions" for a list and Figure III for the location of the counties included in each of the Indian areas discussed here.

The Tahlequah Indian area, five Oklahoma counties, accounted for 16.5 percent of all Indians in the State in 1960. Talihina, with 16 counties, was slightly lower at 16.4 while Clinton-Shawnee included 14 counties and represented 14.1 and Lawton, 12 counties, comprised 12.2 percent of the Indians. The Tulsa SMSA included three counties and had 12.0 percent of the State's Indian residents while the Oklahoma City SMSA, three counties, had 9.8 percent. The remaining 24 counties in Oklahoma accounted for 19.0 percent of the Indian population. (See Figure IV)

PERSONAL CHARACTERISTICS

Age and Sex

The State's 1960 Indian population was almost equally divided between males, 49.8 and females, 50.2 percent. This ratio did not vary appreciably for any reported area. Lawton had the greatest proportion of males, 50.8 while Clinton-Shawnee had the largest female ratio, 51.3 percent.

Oklahoma's 1960 median age of Indians, 20.8 years, was above the United States' Indians level of 19.2 years. Within the State, Tulsa reported the highest median age, 24.0, while Lawton was lowest with 18.3 years. Indian males in Oklahoma averaged 19.8 years, considerably below the 28.8 for all State males. Similarly, Indian females had a median age of 21.7 compared to 31.1 for all females in Oklahoma.

Educational Attainment

One handicap seriously affecting the Indian race is a limited education. In 1960, some 6.0 percent of Oklahoma's Indians, 25 years old and over, were reported as having had no schooling, while for the remainder of the population, 1.4 percent were so classified. At the same time, 58.9 percent of the Indians had not gone beyond the eight grade compared to 40.9 percent for all other residents. Indians completing one or more years of college represented 8.0 percent of their group, less than half the ratio for all others, 17.8 and the State aggregate, 17.6 percent. (See Figure V)

Despite falling below the State average, Indians in Oklahoma were somewhat better educated than the Indians of the United States. The median school years completed by Oklahoma Indians, 25 years old and and over, was 8.3 in 1960 while for the United States, the median was 7.4 years. All races combined had 10.4 years in Oklahoma, slightly below the 10.6 for the Nation. (See Figure VI)

ECONOMIC CHARACTERISTICS

Labor Force Summary

Of all Indians, 14 years old and over, in Oklahoma only 14,188, or 36.3 percent, were attached to the civilian labor force in 1360 compared to 49.6 for the remaining population and 49.3 percent for all races combined. The Indian count was divided between the employed, 12,467, or 87.9 percent of the civilian labor force and the unemployed, 1,721, or 12.1 percent of the total.

The rate of unemployment for Indians of Oklahoma, 12.1 percent, was considerably higher than that of both the remaining population, 4.3, and the total for all races, 4.4 percent. However, Oklahoma's Indians had a lower rate than the Nation's Indian jobless figure, 14.5 percent. (See Figure VI)

Income

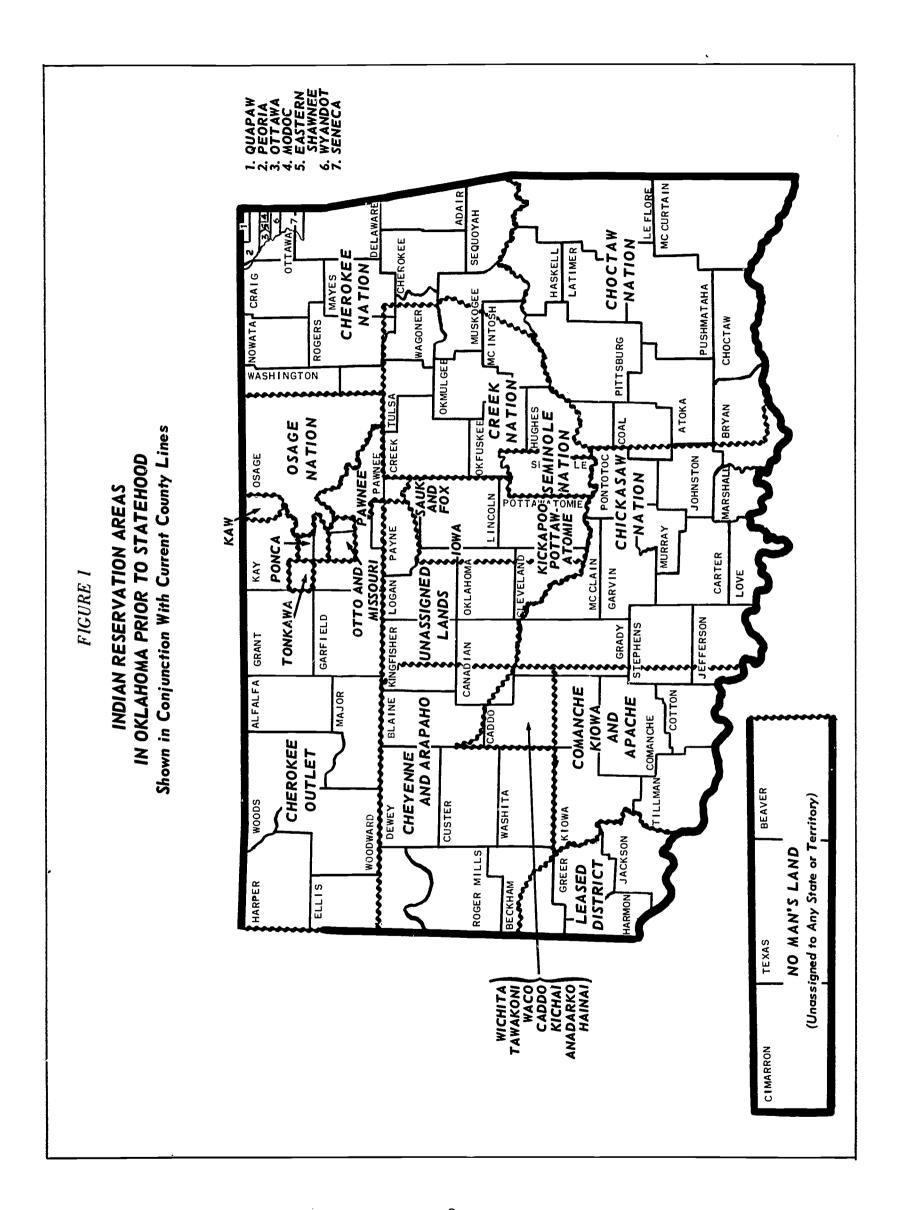

Coupled with, and perhaps the result of, less education and more unemployment, is the fact that Indians have smaller incomes. For example, Oklahoma's total population with earnings in 1959 had a median income of \$2,145, while Indian residents of the State averaged only \$1,212 for that year. Both of these figures for Oklahoma were below that of the U.S. total, \$2,798 and \$1,348 for the Nation's Indians. (See Figure VI)

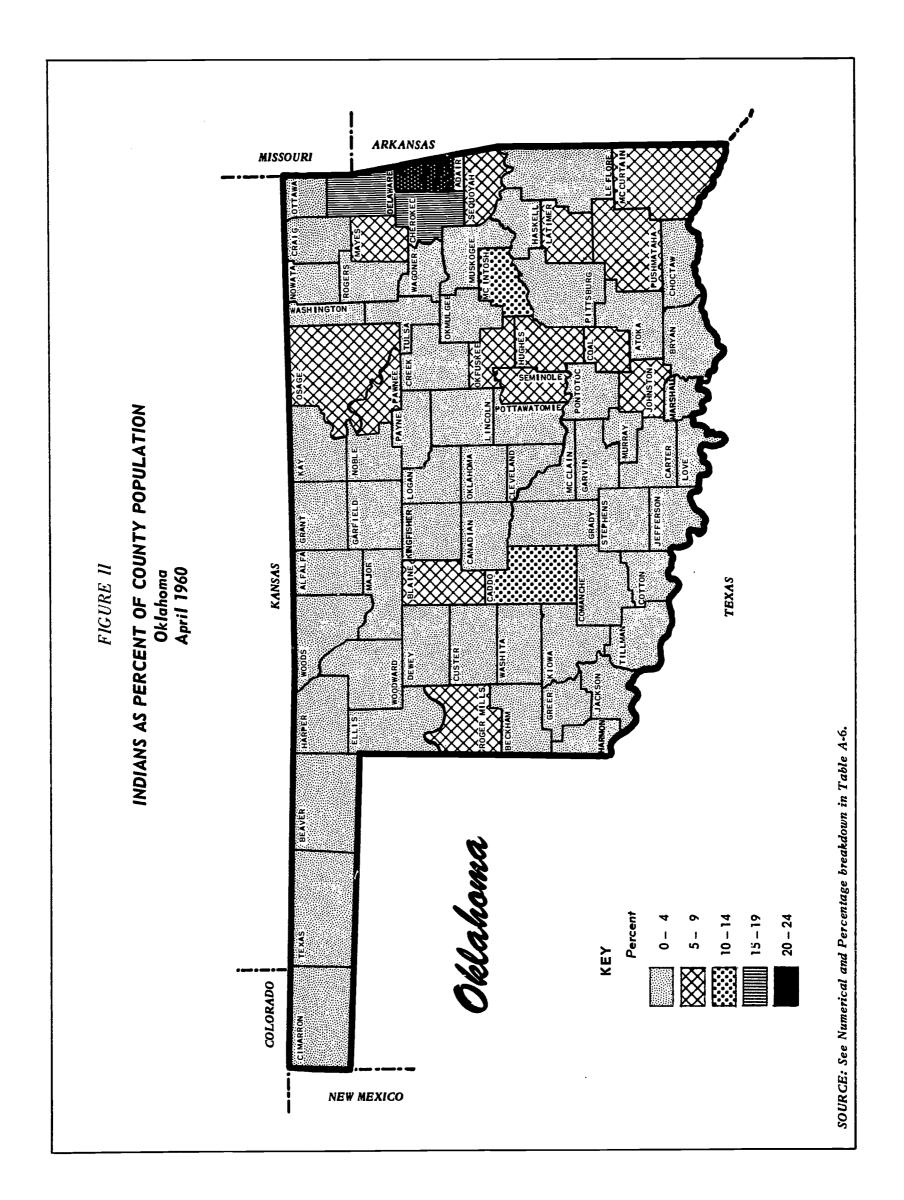

About 73 percent of all Oklahoma Indian males earned less than \$3,000 in 1959 while only 46 percent of all other males were in this category. A further breakdown shows that some 59 percent of the Indians and 34 percent of the remaining males had incomes of less than \$2,000. More specifically, 39.3 percent of the Indian males with incomes earned less than \$1,000; 20.0 percent from \$1,000 to \$1,999 and 13.6 percent had incomes between \$2,000 and \$2,999 during that reported year. (See Figure VII)

SOURCE: U.S. Census of Population: 1960.

DEFINITIONS

Statistical data in this report were derived from various U.S. Census volumes as noted under the "Sources of Data" section. However, certain terms utilized require some explanation. The following definitions, quoted from the census report, Nonwhite Population by Race, U.S. Census of Population, 1960, explain some of the concepts and methods used by the Census Bureau in compiling data on Indians.

<u>Race.---</u>"The concept of race as used by the Bureau of the Census is derived from that which is commonly accepted by the general public. It does not, therefore, reflect clear-cut definitions of biological stock, and several categories obviously refer to national origins.

"American Indian. -- In addition to fullblooded American Indians, persons of mixed White and Indian blood are included in this category if they are enrolled on an Indian tribal or agency roll or if they are regarded as Indians in their community. A common requirement for such enrollment at present is that the proportion of Indian blood should be at least one-fourth.

"Effects of self-enumeration.--- Since the 1960 census was the first in which most respondents had an opportunity to classify themselves with respect to race -- in previous censuses the racial classification was made for the most part by the enumerator on the basis of observation -- it was expected that the character of the racial data in 1960 might differ from that of previous censuses. Some persons undoubtedly would have been classified differently by race in the 1960 census if direct enumeration had been used uniformly especially in families involving mixed racial marriages, but such differences as existed may have been largely offsetting. In terms of the final results, there is little evidence of a change for the major categories.

"The use of self-enumeration may have added to the accuracy of the 1960 count of the Indian population. Studies of the adequacy of the enumeration in the last several censuses have led to the conclusion that it was incomplete as the result of the failure of enumerators to identify off-reservation Indians.

Median.---"The median is presented in connection with the data on age, years of school completed, and income. It is the value which divides the distribution into two equal parts, one-half the cases falling below this value and one-half the cases exceeding this value.

<u>Indian Areas.---"The areas for which statistics on Indians are presented in this report were delineated in cooperation with the Bureau of Indian Affairs, Department of the Interior, and Division of Indian Health, Department of Health, Education and Welfare.</u>

"These areas comprise most counties or groups of counties having 2,500 or more Indians The areas generally contain an Indian population which is relatively homogeneous with respect to tribal and cultural affiliations. However, there may be considerable variation in the character of the areas.

"No attempt has been made to include a description of the area in the area name. The names include reference to an identifying geographic location in the area, the name of one or more major Indian tribe in the area, or the name of the principal reservation or reservations in the area."

COMPOSITION AND LOCATION OF INDIAN AREAS IN OKLAHOMA

Indian Area

County

Marshall, Murray, Pittsburg, Pontotoc,

Pushmataha.

Tables in this report were prepared so as to account for all Oklahoma Indians. Two Standard Metropolitan Statistical Areas are shown; Oklahoma City, which includes Canadian, Cleveland and Oklahoma Counties and Tulsa, which encompasses Creek, Osage and Tulsa Counties. Moreover, data for the 24 remaining counties, not included in Indian areas or SMSAs have been adapted from census volume PC(2)-1C.

^{*}The data presented in this report for the Clinton-Shawnee area exclude Canadian, Cleveland and Oklahoma Counties as they comprise the Oklahoma City SMSA, shown separately.

SOURCES OF DATA

It should be noted that, due to sampling methods, a variation exists between the 1960 Indian population figures reported in some census volumes. For example, volumes PC(1)-A and -B show 523,591 Indians in the United States and 64,689 in Oklahoma. Data in census volumes PC(1)-C and PC(2)-C placed the Indian count at 546,228 for the United States and 62,871 for Oklahoma. Appendix A presents tables based on the first two census volumes while Appendix B deals primarily with the latter source.

Statistical Data

Information on the United States total population was obtained from the following report, which was based on a complete count of the population.

U.S. Census of Population: 1960. Number of Inhabitants, United States Summary. Final Report PC(1)-1A.

Data giving the Indian population in the United States by selected States were obtained from the following report, which was based on a complete count of the population.

U.S. Census of Population: 1960. General Population Characteristics, United States Summary. Final Report PC(1)-1B.

Data on the educational attainment for the United States total population were obtained from the following report, which was based on a 25-percent sample of the population.

U.S. Census of Population: 1960. General Social and Economic Characteristics, United States Summary. Final Report PC(1)-1C.

Data on Oklahoma's total population were obtained from the following report, which was based on a complete count of the population.

U.S. Census of Population: 1960. General Population Characteristic Chlahoma. Final Report PC(1)-38B.

Data pertaining to education and employment for Oklahoma's total population were obtained from the following report, which was based on a 25-percent sample of the population.

U.S. Census of Population: 1960. General Social and Economic Characteristics, Oklahoma. Final Report PC(1)-38C.

Finally, the majority of all information on the Indian race for both the United States and areas in Oklahoma were obtained or adapted from the following report, which was based on a 25-percent sample of the population.

U.S. Census of Population: 1960. Subject Reports. Nonwhite Population by Race. Final Report PC(2)-1C.

Historical Information

The following reference material was used to develop the introductory section on the history of the Indians in Oklahoma.

Wright, Muriel H., A Guide to the Indian Tribes of Oklahoma, Norman, Oklahoma: University of Oklahoma Press, 1951.

Gibson, Arrell M., Oklahoma, A History of Five Centuries, Norman, Oklahoma: Harlow Publishing Company, 1965.
